Education

Dartmouth College, Ph.D. *2009*

Thesis: Linking community and ecosystem dynamics in invasion biology: An experimental approach in coastal sage scrub.
Advisors: Douglas T. Bolger & Kathryn L. Cottingham
Committee: Matthew P. Ayres, Ross A. Virginia, John C. Moore (outside member from NREL)

Wellesley College, B. A. *2002*

Major in Biological Sciences. Minor in Russian. Study-abroad in Oaxaca, Mexico

Appointments

Associate Professor (CRC 2) Forest & Conservation Sciences, University of British Columbia *2018-present*

Assistant Professor, Organismic & Evolutionary Biology, Harvard University 2014-2017

Biodiversity Research Centre Fellow, University of British Columbia *2012-2013*

NSF Postdoctoral Fellow in Bioinformatics, University of California - San Diego *2010 - 2011*

Postdoctoral Associate (6-mo), National Center for Ecological Analysis & Synthesis *2009*

Lecturer, Dartmouth College, Environmental Studies Program *winter term - 2009*

Grants & Fellowships

Canada Research Chair (CRC) Tier 2 in Temporal Ecology ($600,000) *2019-2024*

Canada Foundation for Innovation ($829,000) *2019*
Warmer winters & future forests: How climate and phenology shape temperate woody species communities in North America and globally

BC Farm Adaptation & Innovation Program ($238,660) *2019-2023*
Modeling winegrape phenology for a warming Okanagan

NSERC Discovery ($282,000 total over 6 years) *2018-2023*
Predicting future forests: Understanding diverse phenological responses in North American temperate forests and globally

Milton Fund (Harvard University, $39,766) *2015*
Phenological responses to climate change: Plasticity, local adaptation and the diversity of species' responses

Radcliffe Institute Exploratory Seminar ($20,930, Ailene Ettinger co-PI) *2015-2016*
Predicting future springs: Reconciling experimental and observational approaches for climate change impacts

Biodiversity Postdoctoral Fellowship (UBC, $100,000) *2012 - 2013*

NCEAS Working Group (co-PI with Benjamin I. Cook, $70,250 plus extension) *2010 - 2012*
Forecasting phenology: Integrating ecology, climatology, and phylogeny to understand plant responses to climate change

NSF Postdoctoral Research Fellowship in Biology (**Bioinformatics,** $123,000) *2010 - 2011*
Phenology of plant invasions: How changing seasons and temporal niches assemble plant communities

EPA Science to Achieve Results (STAR) Fellowship ($111,000) *2006 - 2009*
Impact of invasive plants on detrital food webs

SERDP & Southwest Chapter Travel Awards, ESA *August 2009*

ESA Applied Section Student Travel Grant *June 2008*

Jenks Prize, Dartmouth College ($2,000) *June 2008*
Funding to attend UC-Davis Advanced Entomology (Taxonomy & Field Ecology) course

Gilman Fellowship, Dartmouth College ($1,500) *July 2007*
Funding to participate in global collaborative fertilization/exclosure study (Nutrient Network)

Exotic/Invasive Pests and Diseases Research (**UC-IPM,** $23,990) *September 2006 - August 2008*
Title: Impact of exotic Mediterranean annual grasses on detrital food webs

Parkinson Travel Award, Soil Ecology Society *April 2007*

GAANN Fellowship, Dartmouth College ($30,000) *September 2005 - August 2006*

Center for Invasive Plant Management Seed Money Grant ($4,939) *April 2005 - May 2006*

Awards & honors

Killam & ETH Fellowships for sabbatical research on climate hazards *2022*

Early Career Fellow, Ecological Society of America (ESA) *2016-2020*

Tansley Medal Runner-up, *New Phytologist* *2013*

Murray F. Buell Award for best student oral presentation (ESA) *2009*

Graduate Student Filene Teaching Award, Dartmouth College *2009*

Publications

*Denotes lab member; note that last author is senior author.

Teaching

Associate Professor, University of British Columbia *2019-onward*

Ecology in a changing climate (CONS 310)

Experimental design and hierarchical model building with Bayesian inference (FRST 507C-202)

Assistant Professor, Harvard University *Fall 2014-2017*

Modern Conservation Biology (OEB 216; seminar course)
Introduction to Biological Statistics (OEB 153; co-taught with John Wakeley)
Introduction to Experimental Design and Model Building (OEB 201)

Lecturer, with full course responsibilities, Dartmouth College *Winter 2009*

Wilderness & Society, Environmental Studies 7

Teaching Assistant, Dartmouth College *Fall 2003-2007*

Ecological Research in the Tropics I & II (study abroad in Costa Rica)
Ecological Research on Coral Reefs (study abroad, two years: Jamaica and Little Cayman)
Methods in Ecology (2006, Guest-taught Nutrient Network section in 2007-2009)
Introduction to Ecology & Evolution
Vertebrate Biology
Conservation Biology (Environmental Studies Program)
Introduction to Environmental Studies (Environmental Studies Program)

Mentoring, University of British Columbia *2018-onward*

Mira Garner (2019-2021), MSc thesis: Duration of interphenophases in winegrapes
Darwin Sodhi (2019-2021), Graduate student
Deirdre Loughnan (2018-*onward*), Graduate student (PhD), studies how climate and traits shape forest tree phenology and global patterns of trophic asynchrony
Faith Jones (2019-2022), Postdoctoral Fellow
Geoff Legault (2019-2022), Postdoctoral Fellow
Undergraduates: NSERC Students: Sophia Collins (Summer 2021-*onward*), Mika Yasutake (Summer 2019), Adam Fong (Summer 2020); Undergraduate Phoebe Autio (Summer 2020-2021), Work-Learn International: Dinara Mamatova (Summer 2022), Hoai Huang Nguyen (2021-*onward),* Kelley Slimon (Summer 2019-2020), Alina Zeng (Summer 2021-*onward*); Undergraduate Research Assistants (2019-onward): Tolu Amuwo (Co-op, Summer 2020-*onward*), Hannah Bates (2020), Grace Gooding (2022), Sadie Larter (2019), Monica Nguygen (2022-*onward*), Sandy Zhang (2019-2021)

Mentoring, Harvard University *2014-onward*

Daniel Buonaiuto (2016-2022), PhD thesis: Phenological sensitivity as a mediator of plant interactions
Catherine Chamberlain (2016-2021), PhD thesis: Climate change alters temperate tree and shrub spring phenology and false spring risk.
Ailene K. Ettinger (2014-2018), Putnam & NSF Postdoctoral Fellow. Future predictions from current plant collections: Exploiting the novel climates of arboreta to understand tree responses to climate change.
Dan Flynn (2014-2016), Research Associate. Trait-based approaches to understanding adaptation with global change.
Ignacio Morales-Castilla (2016-2017), Research Associate. Predicting the world's future winegrowing

regions and varieties.

Undergraduate Honors Thesis Students: Harold Eyster (2016), Sally Gee (2016), Alice Linder (2017)
Undergraduate Research Assistants (2014-2017): Ryan Antolick, Johan-Arango, Terilyn Chen, Nakoa Farrant, Magaly Gutierrez, Robert Hogg, Ari Korotkin (HUCE), Zhi Li (2017-2018), Alice Linder (Harvard Forest REU), Nicole Merrill, Cara O'Connor (HUCE), Asa Peters (DaRin Butz Intern), Christine Parkent (2017), Cat Principe, Liz Stebbins, Harry Stone, (Harvard Forest REU), Emma Borjigin Wang.

Mentoring, University of California - San Diego *2010-2011*

Worked with one student on phenology bioinformatics and field bird exclosure project.

Mentoring, Dartmouth College *2006-2008*

Worked with 10 undergraduate students in the lab and field, especially with two women for two years: both are now in graduate school for ecology.

Selected Presentations

Wolkovich, E. M. Null models in Temporal Ecology. Helmholtz Institute's 3rd Symposium on Functional Marine Biodiversity (Virtual) 2021

Wolkovich, E. M., Ettinger, A. K., Chamberlain, C.J., Morales-Castilla, I., Buonaiuto. How a 90 minute fake data simulation solved a 3000 hour puzzle. NOAA Northest Fisheries (Virtual) 2020

Wolkovich, E. M., Ettinger, A. K., Chamberlain, C.J., Morales-Castilla, I., Buonaiuto. Chilling dominates forcing and photoperiod cues to determine tree budburst in experiments, complicating forecasts for natural systems. 2020. American Geophysical Union's annual meeting.

Wolkovich, E. M. & D. F. B. Flynn. Phenological assembly in plant communities. Ecological Society of America Annual Meeting. 2017. (Invited)

Wolkovich, E. M. & D. F. B. Flynn. The role of phenological assembly in plant communities. Canadian Society for Ecology & Evolution Meeting. 2017. (Invited)

Wolkovich, E. M. The race for spring: How climate change alters plant communities. University of Toronto Atwood Colloqium. 2017. (Invited)

Wolkovich, E. M. From Pinot to Xinomavro: The world's future winegrowing regions. Harvard University FOOD+ Symposium. 2017. (Invited)

Wolkovich, E. M. Consumer communities in green, brown and non-stationary systems. 15 Years of the Jena Experiment (Jena, Germany). 2017. (Invited)

Wolkovich, E. M. The race for spring: How climate change alters forest plant communities. Montreal Botanical Garden. 2016. (Invited)

Wolkovich, E. M. From Pinot to Cabernet: The future of good wine with climate change. Harvard University FOOD+ Symposium. 2015. (Invited)

Wolkovich, E. M. World Wildlife Fund's Kathryn Fuller Science for Nature Seminar Series. Speaker and panelist for: A Blooming Problem: The Disruptive Impacts of Climate Change on Nature's Calendar. 2015. (Invited)

Wolkovich, E. M. & B. I. Cook. Historical phenological records & applications to global change ecology. European Geophysical Meeting 2014. (Invited)

Wolkovich, E. M., & M. D. Donahue. Climate change & coexistence: The role of temporal variability in structuring communities. American Society of Naturalists 2014 meeting.

Wolkovich, E. M., Cook, B. I. & T. J. Davies. The race for spring: Understanding the diversity of phenological responses. ClimTree 2013. (Invited)

Wolkovich, E. M., Cleland, E. E., Davies, T. J., Schaefer, H., Cook, B. I., Travers, S., Willis, C. & C. Davis. Phenology & plant invasions: Do invaders occupy novel temporal niches? Ecological Society of America (ESA) annual meeting 2012.

Wolkovich, E. M. & Forecasting Phenology working group. 2011-2012. Warming experiments underpredict plant phenological responses to climate change. Talks at American & European Geophysical Union's annual meetings.

Wolkovich, E. M., Cleland, E. E. 2010. Future questions in citizen science: Including phenology in community ecology theory. Invited talk at symposium at ESA annual meeting.

Wolkovich, E. M., Cleland, E. E. 2009. The phenology of plant invasions: How temporal niches assemble plant communities. Phenology 2010 (Dublin).

Wolkovich, E. M. 2008. Invasive annual grasses enhance native shrubs and their arthropod communities through abiotic soil effects. ESA annual meeting. *Won Buell award for best student talk.

Invited Talks & Panels

2022: Agriculture Canada R&D Seminar Series, BIOS 2, George Mason University (Statistics Department), Ohio State's Plant Science Symposium (Keynote), FACT-B French Ameri-Can Climate Talks: Biodiversity, Climate Change Symposium at ASEV National Conference, International Cool Climate Wine Symposium (Keynote for viticulture), Global change at the nexus of climate, biodiversity, and disease - Symposium speaker, BC Winegrape Council

2021: Climate Adaptation & Inovation Seminar Series, HIFMB Symposium on Functional Marine Biodiversity, Stan Generable

2020: Invasives 2020 Forum (Invasive Species Council of BC); Northern Arizona University Ecoinformatics Seminar series; NOAA Northwest Fisheries Seminar Series; Napa County Farm Bureau Continuing Education Class Series (last three all remote)

2019: Simon Fraser University, Wine Business IQ (Napa), Wine Island Growers Asscociation Annual Meeting (Vancouver Island), Invasive Species Council of Metro Vancouver, ACARN Provincial Workshop 2019, (Kelowna, BC)

2018: Swiss Federal Research Institute WSL (Birmensdorf), Napa Vintage Report (California), University of North Carolina (Chapel Hill), Dartmouth Cramer Series, San Diego State University

2017: Jena Experiment (Germany), University of Toronto (Atwood Colloqium, Rising Star in Ecology)

2016: Columbia University (E3B), Montreal Botanical Garden, Wellesley College, Arnold Arboretum Botany Blast (public).

2015: Rice University, Weatherhead Center for International Affairs, Arnold Arboretum Tree Mob (public).

2014: Brown University Open Science (panelist); Woods Hole Marine Biological Lab, University of Massachusetts, Boston; Acadia Science Symposium (public); California Academy of Sciences; Dartmouth; Arnold Arboretum Adult Education Series (public)

2012-2013: Simon Fraser University; University of Victoria

University & Other Professional Service

F1000 Ecology & Global Change Science Advisory Board	*2022- onward*
NCEAS Environmental Data Science Advisory Board	*2020 - onward*
Climate Change Ecology Science Advisory Board	*2021- onward*
Dryad Scientific Advisory Committee	*2020-2022*

Biodiversity Research Centre Postdoctoral Fellow Selection Committee Chair *2022*

Killam Postdoctoral Fellow Selection Committee *2019, 2021*

Climate Change Ecology Special Issue Editor *2020-2021*

Canadian Institute for Ecology & Evolution management board member *2019 - onward*

Stan (probabilistic programming language) non-profit board member *2016 - 2019*

Graduate Committee member, Harvard University *2014-2017*

Editorial Advisory Board member for *Global Change Biology* *2014 - 2017*

Ecological Systems in the Anthropocene seminar series (HUCE) leader *2015 - 2018*

Founder and organizer of Boston Stan (probabilistic programming language) meetup group *2015 - 2017*

Linda Loring Nature Foundation Research Advisory Board member *2015 - 2019*

Biodiversity Discussion Group organizer, University of British Columbia *2012 - 2013*

Tri-University Ecology & Evolution Retreat organizer, University of British Columbia *2012 - 2013*

Graduate student Journal Club organizer (and started club), Dartmouth *January 2004 - 2008*

Reviewer for: *Agricultural & Forest Entomology, Agricultural & Forest Meterology, American Naturalist, Annals of Botany, Applied Vegetation Science, Biogeochemistry, Biological Invasions, Biological Reviews, Biosicence, Climate Research, Climatic Change, Current Biology, Diversity & Distributions, Ecological Applications, Ecology, Ecology Letters, Environmental Research, Functional Ecology, Global Change Biology, Intergovernmental Panel on Climate Change (IPCC): WG IV, International Journal of Biometeorology, International Journal of Climatology, Journal of Animal Ecology, Journal of Applied Ecology, Journal of Ecology, Journal of Vegetation Science, Marine Ecology Progress Series, National Science Foundation, Nature, Nature Climate Change, Nature Ecology & Evolution, New Phytologist, Oecologia, Oikos, Philosophical Transactions of the Royal Society, Physiologia Plantarum, Proceedings of the National Academy, Proceedings of the Royal Society B-Biological Sciences, Science, Scientific Data, Scientific Reports, Soil Biology & Biogeochemistry, Strategic Environmental Research and Development Program, Tree Physiology, Trends in Ecology & Evolution*

Professional Activities & Affiliations

NCEAS Harnessing Diversity in Environmental Data Science Steering Committee 2021-*onward*

NIMBioS Investigative Workshop - Transients in Biological Systems *2019*

StanCon 2018 - conference organizer *2018*

StanCon 2017 - conference organizer *2017*

15 Years of the Jena Experiment: The Past, Present and Future *2017*
Invited speaker for symposium and working group participant

National Center for Ecological Analysis & Synthesis working group participant *2013*
Working group title: ABI Development: A toolbox for analysis of long-term ecological dynamics

USA National Phenology Network RCN participant *2009 - 2013*

Nutrient Network RCN participant (global collaborative experiment) *2007 - 2011*
Site Organizer for Etna, New Hampshire site, with K. L. Cottingham

American Geophysical Union 2011 fall meeting session: Beyond Earlier Spring: Diverse Phenological Responses to Climate Across Species and Ecosystems, co-organizer with B. I. Cook *December 2011*

Cyberinfrastucture for Collaborative Science, workshop participant *May 2011*

National Center for Ecological Analysis & Synthesis working group participant *Fall 2008*
Working group title: Detritus and dynamics of populations, food webs and communities

NCEAS 'Trophic structure across ecosystems' working group participant *Fall 2005 - Fall 2008*
Working group title: Trophic structure across ecosystems

Society Memberships: American Geophysical Union, American Society of Naturalists, Ecological Society of America.

Selected Published Data

*All lab data are public and we work to make all data we use publicly available, following our lab Data Management Plan (tinyurl.com/tempecodmp), which itself has been widely re-used. All data on Knowledge Network for Biocomplexity (http://knb.ecoinformatics.org/) unless otherwise noted.

Selected Outreach

International Cherry Blossom Prediction Competition *2022 - onward*

Open competition to predict date of cherry blossoms in four cities across the globe based on all public cherry blossom data, developed with J. Auerbach & D. Kepplinger (Statistics, George Mason University)

Tree Spotters citizen science group - USA National Phenology Network *2016 - onward*

Developed and led new group for the USA National Phenology Network on widespread woody tree species and focused at the Arnold Arboretum; I continually give lectures and meet with members. Awarded USA-NPN's 2021 PhenoChampion.

Winegrape growers' groups

Give 2-6 lectures as requested each year (some listed under Invited Talks above)

Expert for media on climate change

Over a dozen interviews most years on my own research or current issues in climate change. A selected list is available at https://stateofwine.org/our-work/media/

Skills

Quantitative techniques: Mixed-effects Bayesian models, structural equations, survival models, time-series methods (multivariate autoregressive, wavelets, breakpoints), meta-analysis statistics

Computer languages: Git, LaTeX, Maxima, R, Stan, Sweave.

Languages: Spanish, French (B1), basic knowledge of Russian

Miscellaneous: NAUI Advanced, Rescue and Nitrox diver. Vertebrate exclosures.
